Festive Dhamaka 2025 - Campaign Report

NovaMart Pvt Ltd - Internal document (fictional, for DataMind demo)

Campaign overview

Festive Dhamaka 2025 ran from 15 October to 15 November 2025 across TV, online and in-store channels in all regions, timed around Diwali. The total budget was INR 85 lakh, the largest marketing investment in NovaMart's history.

Offer structure

Electronics and Fashion carried discounts of 15 to 25 percent. The biggest offers were on Smart TVs, the Nova Laptop Air 14, phones, Banarasi silk sarees and the Festive Lehenga Choli. Other categories ran at normal pricing.

Results

Daily order volume during the campaign was close to double the normal run rate. Electronics and Fashion drove most of the increase. October and November 2025 became the two highest revenue months of the year. The West region recovered fully from the Q3 warehouse disruption, as Bhiwandi inventory had been rebuilt.

Comparison with 2024

The 2024 Diwali Utsav campaign (20 October to 10 November 2024, budget INR 55 lakh) focused only on Electronics with discounts of 10 to 20 percent. Festive Dhamaka 2025 was longer, broader and delivered a significantly larger uplift.

Learnings

Deep discounts lowered gross margin per order during the campaign, so the finance team recommends capping Electronics discounts at 20 percent in 2026 except for clearance stock. Online orders grew faster than in-store orders during the campaign.
