Product Quality and Returns Memo - 2025

NovaMart Pvt Ltd - Internal document (fictional, for DataMind demo)

Purpose

This memo summarises product quality issues that affected returns in 2025 and restates NovaMart's return policy.

NovaSound X2 Earbuds battery defect

NovaSound X2 Earbuds launched on 1 March 2025 and sold strongly. From late March, customers began returning units with complaints that the battery drained quickly or the earbuds stopped charging. Investigation traced the issue to a faulty battery cell batch, B-0325, from a single supplier. Between April and June 2025 the return rate for this product rose to roughly 30 percent, against a normal Electronics return rate of about 3 percent.

Corrective action

In July 2025 NovaMart switched to a new battery supplier and released firmware version 1.4, which improved charging behaviour on existing units. Units from the affected batch were replaced free of charge. Returns for the product fell to normal levels from August 2025.

Return policy

Electronics can be returned within 10 days of purchase if defective or damaged. Fashion items can be returned within 30 days for size or colour issues. Grocery items can only be returned for damaged packaging or expired products. Refunds are issued to the original payment method within 7 working days; Cash on Delivery orders are refunded by bank transfer.

Fashion returns

Fashion has the highest structural return rate, around 7 percent, mostly due to size issues. The merchandising team is adding size charts to all product pages in 2026.
